PROJECT: ONTARIO EAST-WEST TIE 230kV TRANSMISSION PROJECT (“OEWT”)

Valard Construction LP (“Valard”) is seeking subcontractors that have the ability to haul material and equipment for the duration of the above noted project and will be accepting quotations with respect to Material Hauling and Equipment Hauling. These services will be required on an as needed/as required basis.

Part 1

Subcontractor will be required to haul various equipment using Subcontractor’s trailer and tractor. A list of potential equipment to be hauled can be found on the Pricing Schedule. Subcontractor will be responsible for traffic control/piloting and obtaining any required permits.

Part 2

Subcontractor will be required to haul Valard material using a Valard highboy trailer from one of our material yards to a predetermined location and returned to the material yard to be reloaded. Subcontractor to supply own tractor for services.

Subcontractor will be required to provide the following documentation along with the completed Pricing Schedule:

1. Certificate of Insurance, Commercial General Liability with a limit of not less than \$5 million, Auto Insurance of a limit of not less \$5 million, proof of Cargo insurance for transportation of equipment and any other insurance which may be required;
2. Current WCB Clearance Letter;
3. Acknowledgement and completion of Section 4 – Subcontractors Control
4. ComplyWorks Account number, if available
5. Acknowledgment of the Terms and Conditions attached to Pricing Schedule

Please confirm via email within 48 hours of receiving this Pricing Schedule if you intend to provide a quote for the services.

Completed packages are to be emailed back to Joanne Choma, jchoma@valard.com by no later than 11:00am MST, December 6, 2019.

Thank you.

Joanne Choma
