COMMUNITY ENERGY CHAMPION (CEC)

The role of the CEC is intended to provide support to the community in reaching its energy goals, by driving and coordinating

- the completion of energy related initiatives within the community. It is MFN's goal to employ a CEC that has the
- passion to implement the recommended actions developed through the CEP process and priorities identified by the community.

Michipicoten's CEC is Gina Simon, who has been instrumental in brainstorming energy initiative ideas, coordinating energy programs, as well as engaging with the community in relation to energy. Gina has commenced several training programs in order to enhance her skillset in the energy field.

Commenced Training Programs:

Energy Manager Training with BCIT
Energy Audit Foundation Training with CIET

Planned Training Programs:

Energy Audit Advisor Training
2020 Catalyst Program

CURRENT PROGRAMS/ INITIATIVES

Youth & Elder's Gathering

Youth Energy Camps

Small Business Lighting Program: received funding to assist commercial buildings in reducing electricity consumption by implementing energy efficient lighting retrofits

FUTURE PROGRAMS/ INITIATIVES

Youth Education Workshops

Community Workshops

Community Engagement

Explore potential and identify funding for solar-powered streetlights First Nation Commercial Building Retrofit Program: MFN to apply to program offered by the IESO to install retrofits of band-owned commercial buildings aimed at reducing electrical consumption.

COMMUNITY ENERGY PLAN (CEP) WHAT IS A CEP?

"Knowledge is power only when shared." Jane Z.

A CEP helps to improve energy efficiency and reduce electricity consumption at the community level. It also helps communities consider opportunities for renewable energy solutions, and can promote a greater interest, awareness, and understanding about energy planning. CEP provides benefits in the following areas:

MFN CEP

MFN is in the process of developing a CEP through funding received by the Independent Electricity System Operator's (IESO) Indigenous Community Energy Plan Program. MFN's CEP is intended to be completed in 2022 and will outline the vision, goals, and recommended action items related to energy for MFN to implement. It is essential for MFN to employ a CEC to implement the recommended actions outlined in the CEP once completed, as well as to monitor the CEP to update the document as necessary.

ENERGY INITIATIVES / PROGRAMS

Many of the energy initiatives and CEC training have been funded by the IESO's Education & Capacity Building Program.

If you have any ideas or would like to learn more about any of these programs or initiatives. I would love to hear from you. EM: g.simon@michipicoten.com
